

Searching for insights to drive your Energy Efficient Building research project?

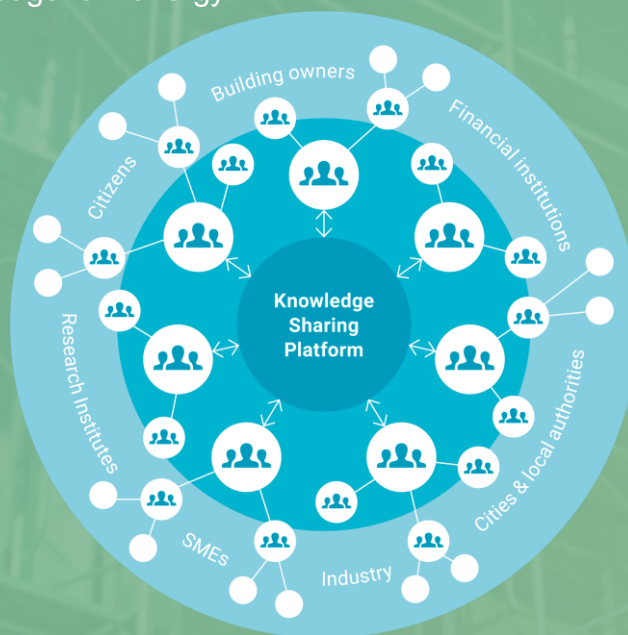

Interested in sharing info on novel building technologies?

Are you representing a research organisation or are involved in a buildings, built environment or construction project in Horizon 2020?

Connect and exchange on the STUNNING Knowledge Sharing Platform with European stakeholders along the construction value chain and share knowledge on energy-efficient building refurbishment packages:

- Publish new technologies and examples of their demonstrations
- Find available solutions
- Search for information on costs and business models
- Get guidance on financing schemes
- Find examples and business cases
- Browse through analyses of implementation constraints
- Share your own good practices and lessons learnt

Adaptable technologies for deep refurbishment

+

Methodologies for design and implementation

+

Business models to increase the renovation rate up to 3% by 2020
