

# Planning to make your home energy-efficient?

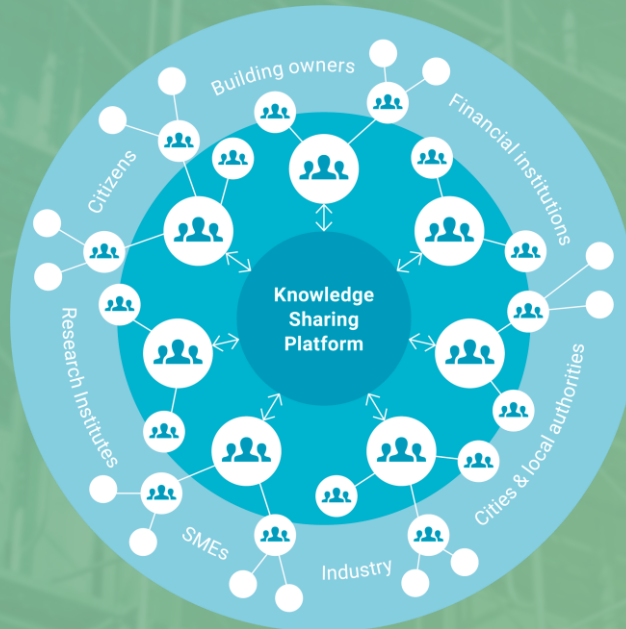

## Interested in highlighting your renovation success story?

**Are you a tenant, private building owner or owner of social housing or office buildings?**

Connect and exchange on the STUNNING Knowledge Sharing Platform with European stakeholders along the construction value chain and share knowledge on energy-efficient building refurbishment packages:

- Find available solutions for energy-efficient renovation
- Find examples, information on costs and the most novel business models for the renovation of private and office buildings
- Identify business models that can be replicated to your own context
- Share your own demonstration examples, good practices and lessons learnt

**Adaptable technologies for deep refurbishment**

+

**Methodologies for design and implementation**

+

**Business models to increase the renovation rate up to 3% by 2020**

=

**Refurbishment package**

**Share your knowledge and join a STUNNING community!**

**Follow us** on our website, LinkedIn or Twitter and receive information through our newsletter

**Become a STUNNING expert** and deliver occasionally information about your own successful refurbishment cases, technologies and business models. Evaluate and give feedback on existing articles

**Reach out as a STUNNING ambassador** and deliver information about your own successful refurbishment cases, technologies and business models! Participate in stakeholder workshops and promote STUNNING in your own community

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 768287.
