

In the need of an innovative, affordable renovation package? Interested in highlighting your renovation success story?

Do you belong to a city or local authority?

Connect and exchange on the STUNNING Knowledge Sharing Platform with European stakeholders along the construction value chain and share knowledge on energy-efficient building refurbishment packages:

- Find available solutions for energy-efficient refurbishment audits or analyses on implementation constraints targeted at city planners
- Find examples, information on costs and the most novel business models for the renovation of public and private buildings
- Identify business models that can be replicated to your own local context
- Share your own good practices and lessons learnt
- Search third party financiers, developers and contractors

Adaptable technologies for deep refurbishment
