

# What's the best design for innovative renovation packages?

## Are you an architect or belong to an architect association?

Connect and exchange on the STUNNING Knowledge Sharing Platform with European stakeholders along the construction value chain and share knowledge on energy-efficient building refurbishment packages:

- Better understand the planning requirements linked to energy-efficient refurbishment of public and residential buildings
- Find available solutions, information on costs and successful business cases
- Find useful analyses of implementation constraints
- Advertise your services
- Start networking and create business contacts with potential customers, sub-contractors or suppliers

Adaptable technologies for deep refurbishment
